Men who have sex with men

Public Health Outcomes Framework:

- 1:1 Support including Safer Sex & Risk Reduction
- Reducing Teenage Pregnancy/Unplanned Pregnancy
- Relationships & Sex Education
- Help to reduce STIs and Promote Testing
- Working with High Risk or Vulnerable Groups
- Network & Training
- Targeted RSE Delivery
- Supporting GPs, Pharmacies and Youth Services to offer Condom Provision - GIO (Get It On)
- Partnership with No Limits and Terrance Higgins Trust

Clients who are sexually active or with the indication to be sexually active soon and with the risk of STIs, teenage pregnancy or **sexual exploitation**

This includes patients who are:

- Practising unprotected sex with multiple sexual partners
- People living with HIV
- Men who have sex with men /Gay/Bisexual/Transitioning/BAME
- Young people, not using contraception
- **Young people, at risk of grooming/exploitation e.g. Low self esteem**
- **In a relationship where there can be an imbalance of power**

****YP at risk of exploitation need to be referred through the SERAF process****

Patients with the following risk factors, will not be considered as appropriate referrals, if they don't have any other sexual health risks or needs:

- Domestic Abuse
- Sexual Assault Victim
- Learning Disabilities (we are not the commissioned service for LD)
- Drugs/Alcohol dependency
- At Risk of Sexual Health Exploitation (we are not the commissioned service for solely sexual exploitation)
- Sex/Porn dependency
- Sex Offenders

Risk factors may not be appropriate on their own, get in contact with the team to discuss your concerns – we might not be able to see the client for 1:1 support but we may be able to signpost.

A 15 year old, in care, having sex with a partner who is 5 years older than them. Not using contraception or condoms. This is an **appropriate** referral as they are at risk of CSE, STI's including HIV and unplanned pregnancy.

A 17 year old male, who is meeting men for sex and not using condoms or prevention methods (vaccination and PrEP). This is an **appropriate** referral as they are at risk of CSE, STI's including HIV.

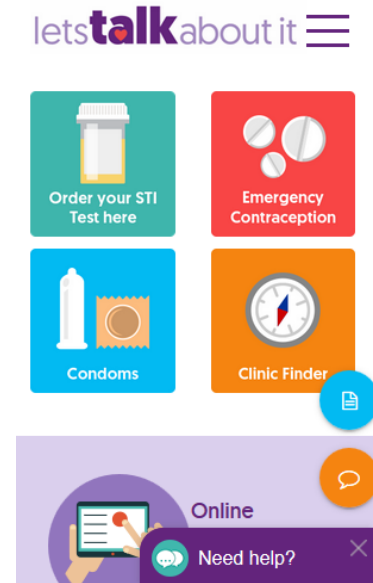

A 16 year old needing support making sexual health choices after their second unplanned pregnancy scare. This is an **appropriate** referral as she is at risk of unplanned teenage pregnancy, STI's including HIV and needs with contraception and decision making.

A young person with learning disabilities asking peers if they would like to see or touch their genitals. This is an **appropriate** referral as they are at risk of sexual exploitation, unplanned pregnancy, STI's including HIV.

Outreach Nursing- Our outreach nurses can support new mothers under 19 for contraception, young people and vulnerable clients with all aspects of sexual health care who are unable to attend mainstream services.

www.letstalkaboutit.nhs.uk/referrals

- Referral form available at www.letstalkaboutit.nhs.uk/referrals
- Complete relevant sections
- Send to: snhs.sexualhealthreferral@nhs.net

If you are unsure if a Sexual Health Promotion Referral is appropriate, please contact the team or your local practitioner.

It is always necessary to gain the patients consent prior to a Sexual Health Promotion referral being made.

We have lots of information written for young people on our website, buttons take individuals to relevant sections on our website. We also have a ['Young persons Advice Guide'](#)

I need advice about contraception

I'm worried about pregnancy

I've been sexually assaulted

I'm under 18 - what do I need to know?

There is a section on our website for '*Professionals*' supporting young people:

www.letstalkaboutit.nhs.uk/rse

- Videos
- RSE Presentation
- Lets Talk RSE Schools Programme (written in line with the DfE RSE 2020 guidance)
- Signposting & Links

We have and are continuing to develop resources to support teachers providing information and education which contribute towards the learning outcomes of the national RSE 2020 guidance for intimate and sexual relationships for secondary level education. **We are currently offering:**

- Let's Talk RSE
- Puberty Lesson Plan
- RSE Schools Presentation
- Videos, Links & Signposting
- HIV Lesson Plan (in development)
- 'Virtually RSE' Talking About Relationships and Sex with Young People, incorporating 'Get It On' Condom Scheme Training.

Find information and resources on our 'Professionals Page'- 'Relationship & Sex Education Support' tab:
www.letstalkaboutit.nhs.uk/rse

Let's Talk RSE is a six session targeted programme, designed to support students who may be more at risk of poorer sexual health outcomes, both emotionally and physically. Delivered free of charge, in partnership with No Limits to targeted schools as identified by local authority, teenage pregnancy and public health.

The six sessions are:

- Puberty
- Relationships
- Consent
- Sexual Health
- Pregnancy
- Self Esteem

These include the topics:

- Delay first sexual activity
- Online Safety
- STIs/Contraception/Condoms
- Diversity
- Healthy relationships
- Communication

www.letstalkaboutit.nhs.uk/letstalkrse

Commonly tested and diagnosed STIs:

- Chlamydia (most commonly diagnosed STI in people aged under 25)
- Gonorrhoea
- HIV
- Syphilis
- HSV (Herpes)
- HPV (Genital Warts)
- Hepatitis B and C (for people in higher risk groups)

Condoms are the only method
of contraception that protects
against STIs!

Some STI's do not have any symptoms so the only way to know is testing after unprotected sex.

'Window Period' refers to the time between when an infection may have been acquired and when the test can reliably detect that infection, so we may ask patients to repeat screening.

What is HIV?

Human Immunodeficiency Virus (HIV) is a virus that attacks cells that help the body fight infection.

There is no cure, but it is treatable with medicine.

People living with HIV on effective treatment cannot pass the virus on to their sexual partners.

PEP stands for Post Exposure
Prophylaxis

PrEP stands for Pre-exposure
Prophylaxis

A lesson plan with facilitator notes for HIV is currently under development and will be available in time for HIV testing week in February 2021!

Order your STI
Test here

Regular Testing

- Chlamydia Testing Kit (15- 24)
- Young People's Walk-in Clinics
- Full STI Kit (18+)

www.letstalkaboutit.nhs.uk/test

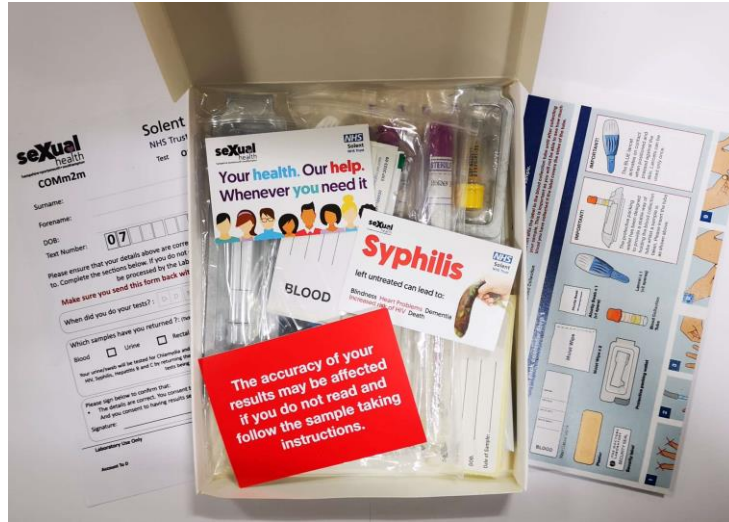

Condoms

Condoms

- GIO Scheme - under 25's
- Condoms by Post - 16+
- Sexual Health Clinics

www.letstalkaboutit.nhs.uk/condoms

Free. Confidential. Discreet packaging.

Contraception helps prevent pregnancy

Some methods are long-lasting (fit & forget), some of which are reversible

Some methods rely on the person taking them regularly (i.e. pill) or each time they have sex (condom)

www.letstalkaboutit.nhs.uk/contraception

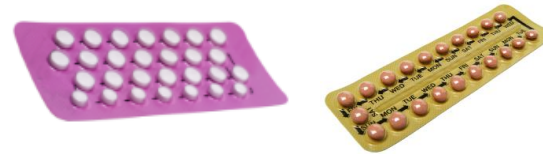

Contraception Tool

www.contraceptionchoices.org/whats-right-for-me

External condom

Pills

Coil

Internal condom

Depo Injection

Implant

Emergency Contraception (morning after pill) is taken after the incident of unprotected sex or failed contraception (e.g. split condom/ missed pills)

It should be accessed as soon as possible after the incident of unprotected sex
